

Healthy food with low eco-impact

Alternative proteins meet circular bioeconomy development | funding | networking

Welcome to the joint online workshop of the Balt-PRO project and the ScanBalt bioeconomy group on Friday 03. September 2021, 09:00 – 11:30 CEST

How could healthy food contribute to a more sustainable food system? We see an increase of alternative protein market share due to changing diets globally. But what about the ecological impact of it to reach sustainability goals? We would like to tackle this question and try on top to boost the transnational exchange of such local experiences to allow learnings from other practices. We also go one step further and start to look at the new EU funding possibilities and exchange on new project ideas. Maybe you get to know the right partner to complete a new value chain and thus bring innovation in the Baltic Sea Region.

Join this digital discussion forum with companies, research institutes and universities of the Baltic Sea Region about healthy food and circular bioeconomy accompanied by an EU funding overview and networking offers within the ScanBalt bioeconomy group.

To register please send an email to Triin Vakker from ScanBalt: tv@scanbalt.org

09:00 – 09:10	Introduction
09:10 – 09:30	How sustainable are alternative protein based products
09:30 – 09:50	New EU programme period: Funding for alternative protein developments
09:50 – 10:00	Q&A
10:00 – 11:00	Six SME/industry pitches on alternative proteins and circular bioeconomy from the Baltic Sea Region
11:00 – 11:20	ScanBalt bioeconomy group -networking for circular bioeconomy in the BSR
11.20 – 11:30	Summary / Wrap-up

The workshop is part of the INTERREG project Balt-PRO: <https://projects.interreg-baltic.eu/projects/balt-pro-247.htm>

Hochschule Neubrandenburg
University of Applied Sciences

Organized and moderated by: Frank Graage, Steinbeis Team Northeast
