

# Baltic Sea Campus on eHealth

**eHealth – interactive, intelligent, innovative**

Tallinn, 2017-Oct-18

**Prof. Dr. Rüdiger Breitschwerdt**  
[breitschwerdt@hs-flensburg.de](mailto:breitschwerdt@hs-flensburg.de), [iemg.de](http://iemg.de)

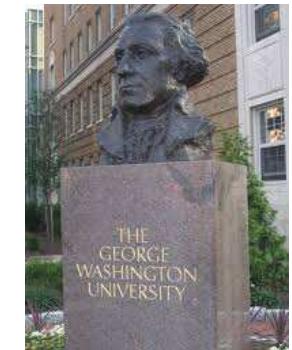

Institut für eHealth und Management  
im Gesundheitswesen

## Introduction

- 2016: Host Lecturer **George Washington University**, D.C.

- Since 2015 in **Board for Medical Informatics** within German **Informatics Society**

- Since 2014 **Professor for eHealth & Hospital Management**, Institute for eHealth and Management in Health Care (**IEMG**), Flensburg University of Applied Sciences (Germany);

since 2015 part of the excellence initiative  
**Baltic Sea Campus on eHealth**

# My Vision for eHealth

---

- **eHealth to be spelled with an ,i‘ more often!**

;-)

## Rewind: wasn't eHealth about ,e'?

---

❖ eHealth

= electronic healthcare

or

= *use of information & communication technologies (ICT) for health*

(WHO 2017)

[eHealth at WHO. <http://www.who.int/ehealth/en/>. Retrieved: 08-08-2017]

## Rewind: wasn't eHealth about ,e'?

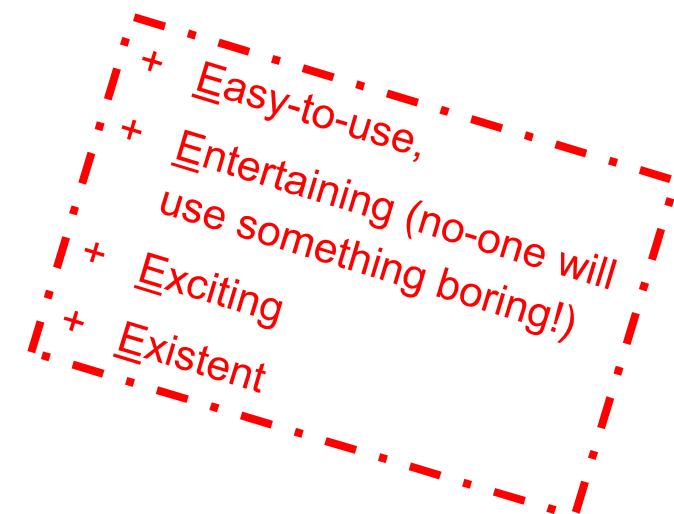

- ❖ 10+ E's (G. Eysenbach, 2001: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1761894/>)

➤ ***Do you know or can you guess them?***

1. **Efficiency**
2. **Enhancing quality of care**
3. **Evidence based**
4. **Empowerment of consumers and patients**
5. **Encouragement of new relationship between patient & health pro's**
6. **Education**
7. **Enabling information exchange and communication in a standardized way**
8. **Extending the scope**
9. **Etics**
10. **Equity**

## Why eHealth with an *i*?

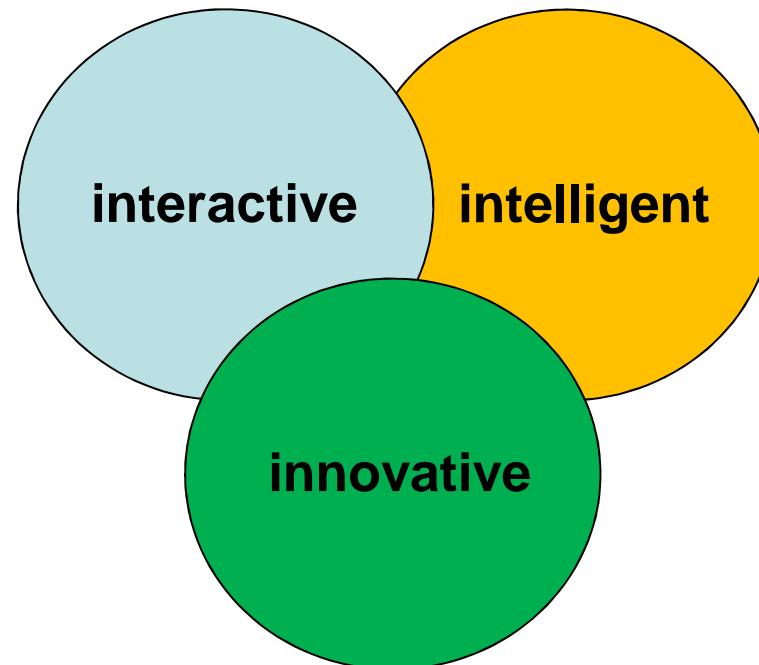

Lessons from success stories: an *i* ' like in

➤ *iPho...*

➤ *interactive*,

➤ *intelligent*,

➤ *innovative!*

# Making eHealth more *interactive* – in different ways

(1) e.g. *BaltCityPrevention* project

- ❖ **get together public health authorities (w/ providers, users)** for tailored services

(2) enabling **peer support** in health apps effective: <http://bit.ly/2ok8lIH>

(3) e.g. <https://lifetime.eu/> *Connected Health* ©

- **exchange of health data**  
**patient's smartphone <-> provider infrastructure**  
(w/o internet connection)

# Making eHealth more *intelligent* (1/2) in terms of *smart*, i.e. situation-specific

## (1) automated workflow support

- e.g. [www.kumihealth.de](http://www.kumihealth.de) © maps **patient-specific data** (e.g. on conditions) to **corresponding therapies**
- offers To-Do-lists, suitable communication pathways to clinical staff

## (2) like first-aider apps

- based on **localization** of registered users' smartphones

## (3) or powered by **data from on-board hardware**

- in individual's watch, phone or other devices
- like cardiovascular or cancer detection via taking 'selfies' from one's eye

# Making eHealth more *intelligent* (2/2) by proven algorithms

- like fertility app [www.naturalcycles.com](http://www.naturalcycles.com) ...
  - officially registered as a **medical device (class II-b)**  
(evidence-based, of course)
- ... or [www.tinnitracks.com](http://www.tinnitracks.com)
  - helps to filter frequencies from patient's favourite music to calm concerned neurons
  - softens Tinnitus intensity, so fewer persons suffer

[Rupp K/ VP Care Management Techniker Health Insurance (2017) Der Patient als Gesundheitsmanager – eine Betrachtung aus Sicht einer Krankenkasse. Presentation 2. FLeGe-Tagung Impulse für das neue Gesundheitswesen: der Patient in der Hauptrolle. Flensburg, 2017-05-31]

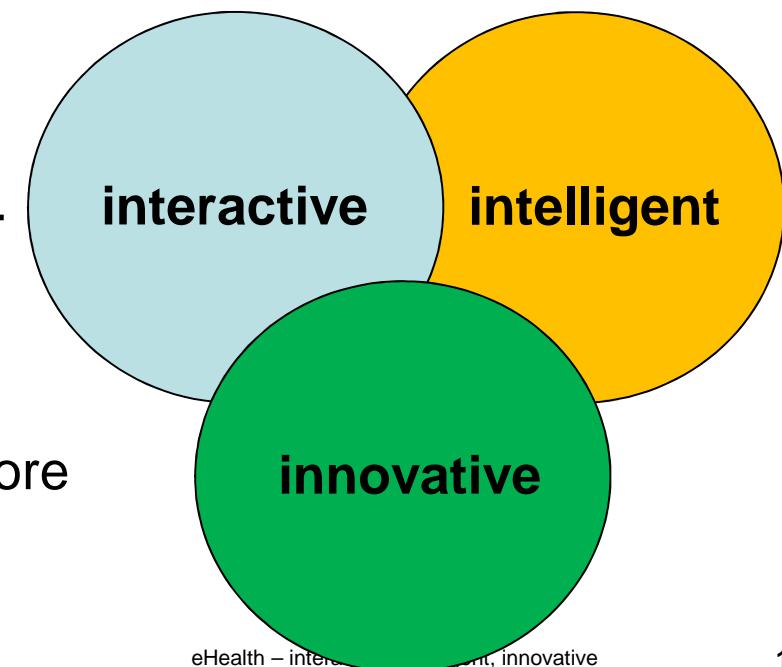

# Making eHealth more innovative: (1/2) incubators of large healthcare players a trend

- *helios.hub*: accelerator by German **hospital chain**
- *Startupbootcamp Digital Health* (e.g. in Berlin): **Philips** one partner
- Accelerator of **Merck & Co.**
- *Healthy Hub* by 5 German **public health insurers**
  - ❖ novel approach (to industry) to nurture eHealth (also more interactive)

# Making eHealth more *innovative* (2/2) by refining business models

- business models need face-lifts
  - today often sponsored, ad-based or selling user data
  - customer **access** via **new channels**, e.g. retailers, or
  - new **reimbursement** ways: directly by insurances, other **authorities**
- ❖ more **eHealth approaches need** to be...
  - Then hopefully we all become more & more healthy (or, in this case, *eHealthi*!)

*...for those who want to keep in touch*
